Studentilor Nr 5, Timisoara, Romania (Home)

ABOUT ME

Passionate and driven final year **Computer Engineering** student and **Software Engineering** at **3Pillar Global**. I possess professional experience in **backend development**, specifically leveraging **Python** with **FastAPI** and **Spring Boot** within **microservices** architectures. Additionally, I have project-based experience in **frontend development** using **React**, **Tailwind CSS**, and various **component libraries**. I am eager to apply and expand my technical expertise in a **junior/mid-level software development** role.

WORK EXPERIENCE

3Pillar Global - Romania, Timisoara

Software Engineer

[04/08/2025 - Current]

Backend development on the **Platforms Team** of the British daily newspaper, **The Telegraph**.

- Experience working in an fast paced **agile enviroment**, participating in daily stand-ups
- Acted as a technical bridge between the Web Platforms team and external stakeholders, ensuring **clear communication and alignment on multi-team projects**
- Built new **microservices** that are used in production using **Python** with **FastAPI**, **Pydantic** for **validation** and wrote **unit tests** with a focus on **maximum code coverage**
- Managed cloud resources on **Google Cloud Platform**, with **Jenkins** as **CI/CD pipeline** and **Terraform** as **IaC**
- **Maintained** and worked on **existing services** for different platforms, such as:
 - **Apple News**
 - **Samsung**
 - **Yahoo**
 - **MSN**
 - **Bloomberg**
- Experience working with **Apple News Format**

EDUCATION & TRAINING

AC Labs @ 3Pillar

3Pillar [03/2025 - 06/2025]

City: Timisoara | **Country:** Romania

Website: <https://www.3pillarglobal.com/>

- Developed a full-stack recipe web app using **Python (Flask)** and **React**, with deployment on **AWS**
- Learned fundamentals of **Git**, **OOP**, **Python web frameworks**, **frontend development**, and **cloud deployment**
- Participated in a competitive selection process (test + interview)
- Emphasis on **real-world web application development** and **cloud integration**

Bachelor degree in Computer Engineering

Universitatea Politehnica Timisoara [2023 - Current]

City: Timisoara | Country: Romania

Website: <https://www.upt.ro/>

Romanian Baccalaureate

Colegiul National "Gheorghe Titeica" [2019 - 2023]

City: Drobeta-Turnu Severin | Country: Romania

Website: <https://www.cngt.ro/>

PROJECTS

[Current]

Project Retriever Service - FastAPI, Redis, Docker, Render, GitHub Actions, Google Gemini AI

A **FastAPI microservice** for fetching, summarising, and caching a GitHub user's pinned project data. It leverages the **GitHub GraphQL API** to extract READMEs and tech stacks, and uses **Google Gemini AI** to generate structured, clean descriptions.

- Fetches pinned GitHub repositories via **GraphQL**.
- Uses **Google Gemini AI** to generate **structured project summaries**.
- Implements **Redis caching** to **avoid redundant AI API calls**.
- Provides **clean JSON logging** and **environment-aware configuration**.
- **CI/CD** through **GitHub Actions** and **Render**
- **Fully containerized** for deployment.
- Will be integrated into a **full-stack CV builder application** designed to automate developer portfolio creation.

Full-Stack Recipe App - Python (Flask), React, MySQL ,AWS, Git, Docker

- Developed a full-stack **recipe management application** with the following features:
 - **Add recipes** with detailed ingredients and steps
 - **Create and assign categories** to organize recipes
 - **View full recipe details**, including preparation instructions and ingredients
 - **Dynamic metric updates** based on the number of servings
- Used **React** for the frontend and **Flask** for the backend
- Connected to a **MySQL database** and deployed to the cloud using **AWS**
- Applied **Docker** for containerized development and **Git** for version control

Steam Games Analysis - Python, Pandas, NumPy, Scikit, NLP, ML

An analysis of the **Steam gaming ecosystem** using data from the **Steam Web API** to study genres, sentiment, pricing, and player refund behaviors.

- Uses **TF-IDF** to identify genre-specific vocabularies.
- Employs **N-Gram analysis** and **Sentiment Analysis (VADER/AFINN)** on user reviews.
- Explores the relationship between **game pricing** and **review quality**.
- Developed a **supervised learning model** to predict **game refunds** based on review sentiment.
- Provides **comprehensive visualizations** of player satisfaction.

SKILLS

Programming languages

Python | JavaScript | C/C++ | Java | CSS | HTML | SQL

Frontend

React.js | Vite | daisy.ui | shadcn/ui | Bootstrap | Tailwind

Backend

FastAPI | Pydantic | JSON | XML | Flask | REST API | Microservice, Monolithic

Databases

MySQL | Supabase | Oracle

DevOps & Cloud

Docker | GCP - Google Cloud Platform | AWS | Infrastructure as Code (Terraform) | Jenkins (tools for software configuration management)

Tools

Git | Visual Studio Code | IntelliJ IDEA | Bruno | Postman | Photoshop

Office

OneDrive | Microsoft Word | Microsoft Office | Microsoft Powerpoint | Microsoft Excel

LANGUAGE SKILLS

Mother tongue(s): Romanian

English

LISTENING: C2 **READING:** C2 **WRITING:** C1

SPOKEN PRODUCTION: B2

SPOKEN INTERACTION: C1
